Dear Colleague,

We are pleased to announce that Balfour Beatty Mott MacDonald has won the Area 10 Asset Support Contact (ASC) today.

The Area 10 contract includes 500km of motorway and trunk route carriageway including 2500 structures throughout Greater Manchester, Cheshire, Merseyside and southern parts of Lancashire.

This contract is the second ASC to be awarded, is worth approximately £300m over the next five years, and forms a significant part of our plan to be our customer’s leading service provider.

In awarding this contract, the Highways Agency has recognised both the value for money we offer and our excellent track record built up in a decade of managing key parts of the strategic road network.

These are challenging times for all providers with a requirement to deliver more for less, in line with the national fiscal situation, but we have anticipated and met this challenge through constant dialogue and engagement with our customer. The award of this contract is recognition of that, together with the good work we have done in Area 2 and 4, and demonstrates our ability to adapt to the requirements of our customer, offering them excellent service at all times.

The contract is due to be mobilised on November 4th and lasts for five years, with an option for a extensions of up to three years.

If you have any questions about this newsletter, or any other feedback, then please contact us at: askoneteam@bbmm.co.uk

Regards,

Tony Gates, Managing Director (Balfour Beatty)
David Tarrant, Managing Director (Mott MacDonald)
