
30 April - London
8 May – London
21 May - Manchester

Buchanan Computing is running a brand new one day course on the very latest TSM chapters.

Simon Morgan will lead this course to update you on the major changes to the Traffic Signs Manual (Chapters 1, 3, 4, 5 and 7) as a result of their recent revision. These chapters cover:

1. General introduction, legal, practical and aesthetic issues, minimising clutter.
3. Regulatory signs and markings
4. Warning signs
5. Other road markings
7. Sign face design for directional and other bespoke signs.

The course will provide a detailed analysis of what the new guidelines and guidance mean for highway authorities and how they differ from the previous versions:

1. Summary of each chapter and its most frequently referenced parts
2. The main changes from the previous versions
3. What authorities might do differently as a result.
4. Interpreting the new wording on traffic authority decision making

Simon was closely involved in the production of these new chapters. He co-ordinated the response from the IHE Traffic Signs Panel to the official consultations and the interim ‘peer review’ drafts, and he personally wrote significant parts of chapters 3 and 7. He is thus the person outside DfT best placed to explain both the thinking behind the new revisions and to highlight the actual changes and new guidance.
