CE MARKING ACCREDITATION

FLI Structures is pleased to announce its attainment of CE marking certification, for steel structures, towers, masts & screw pile foundations. This has been achieved earlier than the EU’s compulsory implementation date of July 2014, under the Construction Products Directive (CPD).

CE marking will be compulsory for fabricated items in the UK by July 1st 2014 and all UK steel manufacturers fabricating steel must comply.

FLI is now well placed by completing the necessary work needed, in order to gain their certification early.

FLI’s Factory Production Control (FPC), management systems and welding procedures have all been certified by the Steel Construction Certification Scheme to comply with CE marking standards.

CE marking is a regulatory mark applied by the manufacturer, that is a declaration to public authorities and clients that the product satisfies required levels of health & safety.

It also signifies that the products conform with the relevant harmonised technical specifications and that the relevant assessment procedures have been complied with.

The letters CE carry the meaning “Conformité Européenne” which translates to European Conformity.

The CE mark is mandatory for specific product groups sold within the EU and all manufacturers must demonstrate they have taken the necessary steps that then allow them to affix the CE mark to their products.

Dave Bufton, FLI’s QHSE Manager explains; “FLI Structures are extremely proud of what we have achieved in gaining our CE marking accreditation. When the infrastructure markets we serve start demanding CE marked products FLI will be ready to deliver. Achieving CE marking accreditation demonstrates our clear commitment delivering first-class quality products to the market”.

About FLI Structures?

Francis & Lewis International Ltd (FLI Structures) is part of the Haley group, a collection of specialist companies based in Great Britain. We are owned and operated by engineers.

FLI Structures, have over 60 years experience in the design, manufacture and installation of steel structures and steel piled foundations.

All design, engineering and manufacturing teams work closely with our clients to provide innovative solutions for their needs. This in turn leads to ongoing continuous improvement and a more efficient product range. Our in-house capabilities give us a competitive edge and allow us to provide a better service to our clients.

FLI work to all the required standards in our diverse set of market sectors and we are known for our high quality and health and safety standards.

FLI are an award winning company making us the safest option for your project.
EC Certificate of Factory Production Control (FPC)

2273 – CPD – 0037

In compliance with Council Directive 89/106/EEC of 21 December 1988 on the approximation of laws, regulations and administrative provisions of the Member States relating to construction products (the Construction Products Directive or CPD), as later amended, it has been stated that the construction product:

Structural Components for Steel Structures

<table>
<thead>
<tr>
<th>Harmonised</th>
<th>Type / Execution Class of the Construction Product</th>
</tr>
</thead>
</table>

Declaration Method
1. 2, 3a and 3b table A.1 of BS EN 1090-1: 2009 + A1:2011

placed on the market by

Francis and Lewis International Ltd
Waterwells Drive, Waterwells Business Park, Gloucester GL2 4AA
and produced in the factory(ies)
Waterwells Drive, Waterwells Business Park, Gloucester GL2 4AA

is submitted by the manufacturer to the initial type-testing of the product, a factory production control and to the further testing of samples taken at the factory in accordance with a prescribed test plan and that the notified body No. 2273 – Steel Construction Certification Scheme Ltd - has performed the initial inspection of the factory and of the factory production control and performs the continuous surveillance, assessment and approval of the factory production control.

Attestation
This certificate attests that all provisions concerning the attestation of factory production control described in Annex ZA of the standard: BS EN 1090-1: 2009 + A1:2011 were applied.

Date of first issue 1st March 2013
Date of this issue 1st March 2013
Date of next Surveillance by 28th February 2014
Validity Period
This certificate remains valid as long as the conditions laid down in the harmonised standard in reference or the manufacturing conditions in the factory or the FPC itself are not modified significantly.

Attention: Mr. David Button

Dear David,

MANAGEMENT SYSTEM CERTIFICATION

I am pleased to forward the new SCCS certificates confirming the compliance and effective implementation of your Management System in accordance with the requirements of

BS EN 1090-1:2009 + A1:2011

The enclosed ‘Conditions of Issue’ confirm that all the certificates issued are and remain the Scheme’s property.

Yours Sincerely,

Jim Carmichael
Scheme Manager.
